ADDITIONAL INFORMATION
for
THOSE INTERESTED IN

KNISCHKA-CREATED-RUBIES

The terms »**genuine ruby**« and »**ruby**« are sometimes used rather permissively, a fact bound to irritate many potential buyers.

On the basis of the price and a **certificate**, anybody interested in rubies ought to be able to distinguish between a **cheap synthesis**, a **luxury synthesis**, or a **natural ruby**.

As **natural rubies** of top quality (e. g. Burma) are getting ever more rare, expensive, and therefore unaffordable for many customers, it is a matter of **good** advice to buy **KNISCHKA-CREATED-RUBIES** at reasonable prices for outstanding value.

As **KNISCHKA-CREATED-RUBIES** grow according to the same laws of probability as **natural rubies**, both show similar internal characteristics (e. g. zonal structure) and **cannot** be distinguished in examinations by means of magnifying glasses. Definite identification is possible only with sophisticated methods of analysis.

KNISCHKA-CREATED-RUBIES are **luxury synthetics** and worth your investment.

Upon request you will be furnished a **Certificate** for your **KNISCHKA-CREATED-RUBY!**
